

HR Analysis

1. How many employee work at company?

SQL Query-

```
SELECT  
    DISTINCT(COUNT(*)) AS TOTAL_EMP  
FROM EMPLOYEE;
```

Output-

	TOTAL_EMP
▶	1500

2. How many employee work at company by each department?

SQL Query-

```
SELECT  
    DEPARTMENT,  
    COUNT(*) AS TOTAL_EMP  
FROM EMPLOYEE  
GROUP BY DEPARTMENT;
```

Output-

	DEPARTMENT	TOTAL_EMP
▶	Research & Development	456
	IT	239
	Human Resources	124
	Finance	166
	Sales	351
	Marketing	164

3. What is average salary pf employee by gender?

SQL Query-

```
SELECT  
    GENDER,  
    ROUND(AVG(MonthlyIncome),2) AS SALARY  
FROM EMPLOYEE  
GROUP BY GENDER;
```

Output-

	GENDER	SALARY
▶	Male	61844.28
	Female	65556.70

4.What is average salary pf employee by gender?

SQL Query-

```
SELECT
    DEPARTMENT,
    ROUND(AVG(MonthlyIncome),2) AS SALARY
FROM EMPLOYEE
GROUP BY DEPARTMENT;
```

Output-

	DEPARTMENT	SALARY
▶	Research & Development	98487.83
	IT	44945.72
	Human Resources	41645.10
	Finance	59245.23
	Sales	45334.50
	Marketing	52377.60

5. What is the promotion rate by Department?

SQL Query-

WITH CTE AS (

```
SELECT
    Department,
    COUNT(*) AS PromotedEmp
FROM EMPLOYEE
WHERE NumPromotions != 0
GROUP BY Department
```

),

CTE2 AS (

```
SELECT
    Department,
    COUNT(*) AS TotalEmp
FROM EMPLOYEE
GROUP BY Department
```

),

CTE3 AS (

```
SELECT
    c.Department,
    ROUND(c.PromotedEmp * 100.0 / c2.TotalEmp, 2) AS PromotionRate
FROM CTE c
JOIN CTE2 c2 ON c.Department = c2.Department
```

)

SELECT

```
    Department,
    ROUND(PromotionRate * 100.0 / (SELECT SUM(PromotionRate) FROM CTE3), 2) AS PromotionRateSharePct
```

FROM CTE3

ORDER BY PromotionRateSharePct DESC;

Output-

	Department	PromotionRateSharePct
▶	Marketing	16.94
	IT	16.93
	Research & Development	16.92
	Finance	16.61
	Sales	16.47
	Human Resources	16.14

6. What overall rate of promotion?

SQL Query-

```
SELECT
    CONCAT(ROUND(((SELECT
                        COUNT(*)
                        FROM EMPLOYEE
                        WHERE NumPromotions != 0) /
                        COUNT(*) * 100, 2), "%") AS PROMOTION_RATE
FROM EMPLOYEE;
```

Output-

	PROMOTION_RATE
▶	75.20%

7. What is the attrition rate of employees?

SQL Query

```
SELECT
    CONCAT(ROUND(((SELECT
                        COUNT(*) AS no_ATTRITION
                        FROM EMPLOYEE
                        WHERE ATTRITION = 'YES') /
                        COUNT(*) * 100, 2), "%") AS ATTRITION_RATE
FROM EMPLOYEE;
```

Output –

	ATTRITION_RATE
▶	10.33%

8. What is rate of job satisfaction by department?

SQL Query-

```
SELECT
    DEPARTMENT,
    ROUND(AVG(JobSatisfaction), 2) AS JOBSATISFICATION,
    ROUND(AVG(EnvironmentSatisfaction), 2) AS EnvironmentSatisfaction,
    ROUND(AVG(WORKLIFEBALANCE), 2) AS WORKLIFEBALANCE
FROM EMPLOYEE
GROUP BY DEPARTMENT;
```

Output-

	DEPARTMENT	JOBSATISFICATION	EnvironmentSatisfaction	WORKLIFEBALANCE
►	Research & Development	2.98	2.88	2.80
	IT	2.85	2.97	2.83
	Human Resources	2.96	2.99	2.95
	Finance	2.92	2.96	2.70
	Sales	2.89	2.94	2.85
	Marketing	2.91	2.82	2.76

9.What is average salary by experience?

SQL Query-

SELECT

YearsAtCompany,

ROUND(AVG(MonthlyIncome),2) AS SALARY

FROM EMPLOYEE

GROUP BY YearsAtCompany

ORDER BY YearsAtCompany;

Output-

	YearsAtCompany	SALARY
►	0	45278.19
	1	55878.48
	2	59217.48
	3	63710.50
	4	66883.77
	5	66614.02
	6	87476.67
	7	65131.83
	8	79438.11
	9	77641.77
	10	59237.42
	11	89229.33
	12	94913.81

10.What are the recruitment source of employees ? How employee came from all every recruitment source?

SQL Query-

SELECT

RecruitmentSource,

COUNT(*) AS NO_OF_EMPLOYEE

FROM EMPLOYEE

GROUP BY RecruitmentSource;

Output-

	RecruitmentSource	NO_OF_EMPLOYEE
►	Job Portal	307
	Referral	314
	Consultancy	158
	LinkedIn	372
	Walk-in	147
	Campus Hiring	202

11. How many no of attrition by department?

SQL Query-

```
SELECT
    DEPARTMENT,
    COUNT(ATTRITION) AS NO_OF_EMPLOYEE
FROM EMPLOYEE
WHERE ATTRITION="YES"
GROUP BY DEPARTMENT;
```

Output-

	DEPARTMENT	NO_OF_EMPLOYEE
▶	Sales	38
	Research & Development	38
	IT	26
	Human Resources	12
	Marketing	23
	Finance	18

12. What is work arrangement of employees?

SQL Query-

```
SELECT
    RemoteWorkType,
    COUNT(*) AS EmployeeCount,
    CONCAT(ROUND(COUNT(*) * 100.0 / (SELECT COUNT(*) FROM EMPLOYEE), 2), "%") AS Percentage_rate
FROM EMPLOYEE
GROUP BY RemoteWorkType
ORDER BY EmployeeCount DESC;
```

Output-

	RemoteWorkType	EmployeeCount	Percentage
▶	On-site	702	46.80%
	Hybrid	550	36.67%
	Remote	248	16.53%

13. What is the average team size by department?

SQL Query-

```
SELECT
    Department,
    AVG(TeamSize) AS Avgteamsize
FROM EMPLOYEE
GROUP BY Department;
```

Output-

	Department	Avgteamsize
▶	Research & Development	13.2851
	IT	13.6820
	Human Resources	13.5242
	Finance	13.5843
	Sales	12.8917
	Marketing	14.2378
